CHAPTER I GENERAL PROVISIONS

Article 1 Subject matter

1. This Regulation lays down requirements regarding the design, labelling, conformity assessment, manufacture and placing on the market of portable batteries and light means of transport batteries, in order to ensure the free movement of such products within the internal market while protecting human health and the environment.

2. This Regulation applies to all categories of batteries, regardless of their shape, volume, weight, design, material composition, chemistry, use or purpose, including batteries incorporated into or added to appliances.

Article 2 Restriction of hazardous substances

1. Batteries, whether or not incorporated into appliances, light means of transport or other vehicles, shall not contain more than 0.0005 % of mercury (expressed as mercury metal) by weight, and the economic operator shall keep technical documentation demonstrating compliance with this requirement for a period of ten years.

2. Portable batteries shall not contain more than 0.002 % of cadmium (expressed as cadmium metal) by weight.

Article 3 Labelling

1. By 18 August 2026, batteries shall be marked with a label containing general information about them, including the manufacturer identification, the battery category, the date of manufacture and the chemistry, as specified in Part A of Annex VI.
